

Day 2 - Written Content

Objective

Learn Apex Collections, Bulkification, Future Methods, and Lightning Web Components.

Collections

List stores ordered values, Set stores unique values, and Map stores key-value pairs.

Bulkification

Moved SOQL queries outside loops to improve performance and support bulk processing.

Future Method

Used an @future method to perform asynchronous processing.

Lightning Web Components

Implemented parent-child communication using @api properties and CustomEvent.

Deployment

Deployed the components successfully and verified the output in Salesforce.

Conclusion

Learned Collections, Bulkification, Future Methods, LWC development, deployment, and component communication.
